

Io Jannela Serrano
BSIT 2-5

Question 1

1 / 1 pts

What Java class provides methods like `max()`, `min()`, and `sqrt()`?

Question 2

1 / 1 pts

Which part of a method specifies what value it returns?

Question 3

1 / 1 pts

If an array is declared with a fixed size, can its size dynamically increase during program execution without creating a new array?

Question 4

1 / 1 pts

What structure stores multiple values in one variable?

Question 5

1 / 1 pts

When looping through a one-dimensional array, is it correct to use the condition `i < array.length` to avoid errors?

Question 6

1 / 1 pts

Which of the following is a correct method declaration?

Question 7

1 / 1 pts

What is the value of `matrix[1][2]` in a 2D array?

Question 8

1 / 1 pts

What is the term for a method already defined in Java libraries?

Question 9

1 / 1 pts

What keyword is used to return a value from a method?

Question 10

1 / 1 pts

If a method has parameters but no arguments are passed during the method call, will the program execute correctly without errors?

Question 11

0 / 1 pts

What loop structure is used for iterating rows and columns in 2D arrays?

Question 12

1 / 1 pts

What will the method `int add(int a, int b)` return?

Question 13

1 / 1 pts

What do you call the visibility level of a method?

Question 14

1 / 1 pts

What is required to execute a method?

Question 15

1 / 1 pts

If a nested loop is used to display elements of a 2D array, will removing the inner loop still allow all elements to be printed correctly?

Question 16

1 / 1 pts

What is required for a loop to continue?

Question 17

1 / 1 pts

What does `continue` do?

Question 18

1 / 1 pts

Statement used for multiple selections.

Question 19

1 / 1 pts

switch can replace if-else-if.

Question 20

1 / 1 pts

Java executes code randomly.

Question 21

1 / 1 pts

Control flow statements manage execution order.

Question 22

1 / 1 pts

What is the main purpose of control flow statements in Java?

Question 23

1 / 1 pts

An if statement inside another if statement.

Question 24

0 / 1 pts

What will be output?

```
for(int i=1;i<=3;i++){  
    System.out.print(i);  
}
```

Question 25

1 / 1 pts

Which loop is best when iterations are unknown?

Question 26

0 / 1 pts

Which statement is optional in switch?

Question 27

0 / 1 pts

Loop component that updates variable.

Question 28

1 / 1 pts

Keyword that exits a loop.

Question 29

1 / 1 pts

What type of loop is `for ( ; ; )`?

Question 30

1 / 1 pts

Keyword that skips current iteration.

Question 31

1 / 1 pts

What Scanner method reads long values?

Question 32

1 / 1 pts

Which command runs a compiled Java program?

Question 33

1 / 1 pts

If a developer uses `nextFloat()` to read an integer value such as `10`, will the program still accept and convert it into a float?

Question 34

1 / 1 pts

What class provides parsing methods like `nextInt()` and `nextDouble()`?

Question 35

1 / 1 pts

If the `Scanner` class is not closed after usage, will it potentially lead to memory leaks or resource issues?

Question 36

1 / 1 pts

Which Scanner method reads a floating-point number?

Question 37

1 / 1 pts

Which method is used to read an entire line using Scanner?

Question 38

1 / 1 pts

Which command compiles a Java program?

Question 39

1 / 1 pts

If a developer forgets to wrap `System.in` with `InputStreamReader` before using `BufferedReader`, will the program still compile and run correctly?

Question 40

0 / 1 pts

What type of input involves storing data in files for later use?

Question 41

1 / 1 pts

Which input type allows data to be passed during program execution through terminal commands?

Question 42

1 / 1 pts

What is the wrapper class used before `BufferedReader`?

Question 43

0 / 1 pts

How are command line inputs treated by the JVM?

Question 44

1 / 1 pts

If a programmer writes `java MyProgram 10 20`, will the values `10` and `20` be treated as integer types directly by the JVM?

Question 45

1 / 1 pts

If a program uses `Console` and is executed inside some IDEs, will `System.console()` always return a valid `Console` object?
